

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

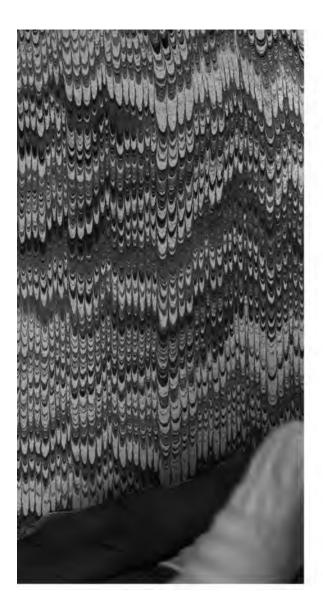

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

DICTIONARY

OF THE

FRENCH AND ENGLISH LANGUAGES.

IN TWO PARTS.

I. FRENCH-ENGLISH. II. ENGLISH-FRENCH.

WITH

VOCABULARY OF PROPER NAMES.

for the Mse of Schools and for General Reference.

BY GABRIEL SURENNE, F.A.S.E.

French Teacher in Edinburgh; French Master in the Merchant Maiden Hospital; and Leaturer on Military Bistory and Aut'quities in the Scottish Naval and Military Academy; Corresponder; Member of the Grammatical Society of Paris; and Author of *The Sheduid ...

Pronouncing Dictionary of the French and English Language, &c. **

. Recently published, in large 12mo, 10s. 6d. bound, the Eighth Edition of

SURENNE'S PRONOUNCING DICTIONARY OF THE FRENCH AND ENGLISH LANGUAGES.

This Work includes Definitions of Terms connected with Science and the Fine Arts, of 11,000 Terms of Modern Introduction to the Language, and of 4000 Historical and 4000 Geographical Names.

Also.

In fcap 8vo, 3s. 6d. bound, corrected to 1851, Remodelled and Enlarged, the Ninth Edition of

SURENNE'S NEW FRENCH MANUAL,' AND TRAVELLER'S COMPANION:

Embracing all the Topics of Every-day Life, a Guide to Paris, and a Description of the Principal Continental Tours; the whole forming a complete Series of Dialogues in French and English. With an Introduction to French Pronunciation, and Models of Epistolary Correspondence. The Pronunciation is marked throughout, and the Work contains Three Maps.

On the same Plan, containing 144 pages, 2s. bound, SURENNE'S NEW FRENCH DIALOGUES, WITH A COPIOUS VOCABULABY.

PREFACE.

The success of Mr Surenne's "Standard Pronouncing Dictionary of the French and English Languages" has encouraged the belief that the public would receive favourably a smaller Dictionary by the same Author, at a cheaper price. The present work has accordingly been prepared—in two parts—French and English—English and French, each containing an ample dictionary and copious definitions, with a Vocabulary of Proper Names at the end of the volume.

In compiling this abridgment of the larger work, all the words have been retained except those which have become obsolete, or whose technicality precluded their insertion in a popular Dictionary. At the same time, due regard has been paid to the introduction of such new words and definitions as the progressive changes in the language have rendered necessary; and for this purpose the best and most recent authorities have been anxiously consulted. It is therefore confidently anticipated that the volume will prove not only a useful auxiliary to the student, but also a convenient Pocket Companion to the traveller wherever the French language is spoken.

EDINBURGH, November 1851.

DICTIONARY

OF THE

FRENCH AND ENGLISH LANGUAGES.

PART I .- FRENCH AND ENGLISH.

FRENCH MONEY TABLE.

The value of the Coins is given in francs and centimes, the money in which accounts are now kept in France, and also in sterling. The franc is equal to 100 centimes, and is estimated at 9½d. sterling, being equivalent to 25 francs 26 centimes for £1. The monetary unit in France was formerly the livre, in value about $1\frac{1}{2}$ per cent. less than the franc.

MEASURES AND WEIGHTS OF FRANCE.

THE standard Measures and Weights of France are of two kinds: 1st, Th Metrical, or Decimal System, used in government transactions, in wholesal trade, and for scientific purposes; and, 2d, The Systeme Usuel, a modificatio of the former, employed in retail trade.

THE METRICAL SYSTEM.

Instituted in 1795, is founded upon the distance of the Pole from the Equator the ten millionth part of which, denominated a mebre, is decreed to be the un of length. The other units are—of surface, the are; of solidity, the stere; of a pacity, the litre; and of weight, the gramme, weighing I cubic centimètre (water at its maximum of density; and the Latin derivatives, déci (tenth of centi (hundredth of), mille (thousandth of), being prefixed to that expressin the unit, serve to denominate its subdivisions; while the Greek derivative déca (ten), betto (one hundred), kilo (thousand), myria (ten thousand), aprie its multiples. Thus, déci-mètre denotes the 15th of a mètre, and déca-mèt

The metrical quintal of 100 kilogrammes equal 1 hundredweight, 3 quarters, 24 pounds, 72 ounces avoirdupois; and 10 quintals, the weight of a cubic mètre of water, make 1 millier, or tonneau-de-mer, equal 19 hundredweights, 2 quarters, 20 pounds, 131 ounces avoirdupois.

THE SYSTÈME USUEL

Was established in 1812 for the purposes of retail trade, in consequence of the aversion shown by the common people to the innovations of the metrical system. It tolerates the names of the old measures necessary in the inferior departments of trade, while, by a slight alteration, the value of these measures is so fixed as to bear certain definite proportions to the metrical system. Its divisions, also, instead of being decimal, are chiefly binary, from the greater convenience of the latter in small transactions.

Toise usuelle = 2 mètres = 6 Imperial feet 61 inches.

Pied usuel = | of the toise

Aune usuelle = 12 décimètres = 471 Imperial inches.

Litron usuel = 1 litre = 13 Imperial pint nearly.

Boliseau usuel = 1 hetcolitre = 1 Imperial peck and 3 quarts nearly.

Livre usuelle = 1 killogramme = 1 pound 1 pc and 104 drams avoirdupois, or 7717 troy grains.

ROUIVALENTS OF THE BRITISH OR IMPERIAL MEASURES AND WRIGHTS IN THE FRENCH METRICAL SYSTEM.

Measures of Length.—The yard of 3 feet, or 36 inches, equal 914\frac{1}{2} millimètres, or about \frac{1}{2}\text{ths of a mètre; and 32 mètres equal 35 yards nearly. The mile of 3 furiongs, 320 poies, or 1760 yards, equal 1609 mètres and 315 millimètres.

Measures of Surface.—The acre of 4 roots, 160 square poies or perches, or 4840 square yards, equal 40 ares and 47 centiares; and 42 acres equal 17 hectares

nearly.

Measures of Solidity.—The cubic yard of 27 cubic feet, equal 721 decisteres.

Liquid Measures.—The imperial gallon of 4 quarts, 8 pints, or 32 gills, equal 4 litres and 541 centilitres; and 11 imperial gallons equal 50 litres nearly.

Dry Measures.—The Imperial bushel of 4 pecks, or 8 gallons, equal 36 litres and 34 centilitres. The imperial quarter of 8 bushels, equal 2 hectolitres, 9 decalitres, and 78 centilitres; and 11 imperial quarters equal 32 hectolitres nearly. The last is 10 quarters, equal 29 hectolitres. Avoirdupois, or Commercial Weight.—The pound of 16 ounces, or 256 drams,

Arotraupous, or Commerciae Weight.—In pounds of 10 ounces, or 250 drams, equal 453 grammes. The stone of 14 pounds, equal 6 kilogrammes, and 349 grammes. The hundredweight of 4 quarters, or 112 pounds, equal 50½ kilogrammes nearly. The ton of 20 hundredweights, equal 1015½ kilogrammes.

Troy, or Gold and Silver Weight.—The pound of 12 ounces, 240 pennyweights, or 5760 grains, equal 373 grammes and 202 milligrammes.

THE END.
